- linkedin.com
- praveenkumar-portfolio
- Chennai, Tamil Nadu

Full-stack developer with **3+ years of experience** building scalable SaaS and mobile applications using **React.js, React Native, and Node.js**. Experienced in designing **real-time systems, payment integrations, and high-performance APIs**. Delivered production platforms supporting **500+ active users**, improving operational efficiency through automation and optimized frontend architecture.

EDUCATION

- M.Sc Computer Science**
A Veeriya Vandayar Memorial Sri Pushpam College,
Thanjavur,
Bharathidasan University,
2019 – 2021
- B.Sc Computer Science**
National College,
Tiruchirappalli,
Bharathidasan University,
2016 - 2019

TECHNICAL SKILLS

Frontend:

React.js, React Native, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Material UI, Bootstrap

Backend:

Node.js, Express.js, REST APIs

Database:

MongoDB, MSSQL

State Management:

Redux, Redux Toolkit

Real-Time Systems:

WebSockets, Firebase

Tools & Platforms:

Git, GitHub, Postman, VS Code

Language

Tamil - Read – Write – Speak

English - Read – Write – Speak

PROFESSIONAL EXPERIENCE

Sankara Software Solutions Pvt Ltd — Full Stack Developer Chennai, India | March 2024 – March 2026

- Led development of Resilink, a society management platform serving 500+ active users, enabling digital payments and real-time communication
- Integrated secure payment gateway using Razorpay, automating maintenance payments and reducing manual processing by ~40%
- Architected and implemented WebSocket-based notification system, improving real-time responsiveness and reducing user action latency by ~20%
- Built reusable UI component library using Material UI, Bootstrap, and Tailwind CSS, reducing development time by ~30%
- Developed Project Hub, a Jira-like project management system with task tracking, Kanban boards, and collaboration features, improving team productivity and workflow visibility
- Led migration of JetEdge Owner Portal from .NET to React.js, improving frontend performance and reducing page load time by ~35%; developed Node.js REST APIs to support new frontend architecture and optimize data retrieval.
- Designed and integrated scalable REST APIs with Redux-based state management, ensuring maintainable and high-performance application architecture

MacroMend — Full Stack Developer Salem, India | Apr 2023 – February 2024

- Developed responsive UI for MAPIMS platform, improving cross-device usability and increasing user engagement by ~25%
- Integrated REST APIs and implemented state management, ensuring seamless data flow and improved frontend performance
- Optimized mobile app performance and reduced app load time by ~15–20%

PROJECTS

Resilink — Resident & Society Management Platform

Technologies: React.js, React Native, Node.js, MongoDB, Razorpay, Firebase

- Developed **responsive UI for web (React.js) and mobile (React Native)** platforms used by **500+ residents** for society management.
- Built frontend modules for **billing dashboard, payment interface, and resident management**, integrating Razorpay payment APIs.
- Integrated **REST APIs** to enable automated billing and online payments, reducing manual administrative work by ~40%.
- Implemented **real-time notification UI components** connected to WebSocket services, improving user communication and engagement.
- Developed **secure authentication flows and role-based UI access** for admin and resident workflows using **JWT-based API integration**.

Project Hub — Project Management System

Technologies: React.js, Node.js, MSSQL, WebSocket

- Developed a **full-stack project management platform (Jira-like)** using **React.js, Node.js, and MSSQL**, enabling teams to manage projects through **Kanban boards, dashboards, and task workflows**.
- Designed and implemented **RESTful APIs in Node.js** for task creation, assignment, status updates, and project tracking.
- Built **real-time task updates using WebSockets**, ensuring instant synchronization across team members and reducing communication delays.
- Structured **MSSQL database schema for projects, tasks, users, and activity logs**, improving task tracking and workflow visibility.
- Implemented **timezone-aware scheduling and activity logs**, automatically rendering timestamps based on each user's locale for seamless global collaboration.
- Improved team productivity by ~30% through **structured workflow management and real-time task tracking**.

KEY ACHIEVEMENTS:

- Reduced frontend development effort by ~30% through reusable component architecture
- Built real-time systems improving responsiveness by ~20%
- Delivered scalable applications actively used by 500+ users
- Successfully implemented payment and notification systems in production environments
